

# transight Xpress

by cuscap

“...Transight Xpress brings you a solution that is fast, reliable, highly versatile and easy to manage.”

The Food & Beverage (F&B) Industry remains under constant pressure to meet the changing demands of today's consumer. The obligation to rapidly adjust product lines in order to keep up with the pace of change, while assuring quality and efficiency calls for the never ending need for simplicity and reliability.

The ability to apply innovative technology to meet the market's demands is critical as you face the challenge of competing not only with major franchise competitors, but also with other operators who are already benefiting from store automation.

Transight Xpress offers you an easy to use solution that equips you to keep pace with the competition. Through Transight Xpress, you will gain a new level of control over your operations, increasing efficiency, boosting profits, and helping you fine-tune your business.

## Simplify your business

Transight Xpress, developed based on Cuscapi's premier F&B Business Management solutions, Transight, combines rich functionalities with cost-saving technology to create the ideal point-of-sale (POS) solution for your business.

Designed to reduce total cost of ownership, Transight Xpress is simple to install, manage, and easy to acquire through its affordable price. Essentially, this affordable solution helps deliver the right amount of power, technology and convenience you need to help you realise the full potential of your resources and access to customer knowledge in order to maximise customer lifetime values; bringing your customers closer to you.

With its operative functionalities and simple architecture, Transight Xpress is geared to meet the needs of first time users as well as clients who simply wants an easy-to-operate solution that supports the F&B outlet's basic, but critical operations. Transight Xpress' rich user interface features and touch screen capability shortens the turn-around time from table orders to cashier payment; ideal for different types of establishments, from fine dining restaurants to smaller high-volume F&B outlets.

## Targeted functionalities that meet your needs

### Reduced operational cost

Designed to alleviate the burden of information overload without the loss of essential features at the lowest possible cost, Transight Xpress helps reduce cost of operations by automating several operations and helps with business pattern analysis, empowering you with the right information for accurate cost control.

### Improved service effectiveness

Transight Xpress, with the incorporation of touch screen technology, helps increase speed of service to customers and registers all sales transactions; essential to all thriving businesses. Fast service increases table-turns, improves customer satisfaction and encourages repeat visits.

### Minimise operational risks

Transight Xpress helps you reduce pilferages by offering accurate, real-time record of all sales transactions. With user-based roles and tight security features, you can protect critical information and ensure employees work with the tasks and information appropriate to their job and minimise your operational risks.

### Simplified reporting

Transight Xpress gives you a complete view of your business with the incorporation of a list of all the essential reports to fulfil your need for information to ensure your business decisions are built on accurate, real time information. The available reports generated will provide you with a clear picture of store performance with easy generation of closed check journals for auditing purposes.

## Key features:

Entry Screen

### Simple architecture

Efficiency is the one of the utmost objectives of any organisation. With that in mind, Transight Xpress was built upon simple architecture to increase operation efficiency and speed of familiarisation. Its simple operation steps ensure shorter training period for staff, getting your business up and running in the shortest time frame possible.

### Rich functionalities

Developed through many years of industry experience, Transight Xpress is packed with essential functions catered to meet the needs of your business and demands of your customers. Lunch and evening menus can be pre-configured while controls on item prices by time (e.g. Happy Hour) are also available, among many others.

### Express implementation

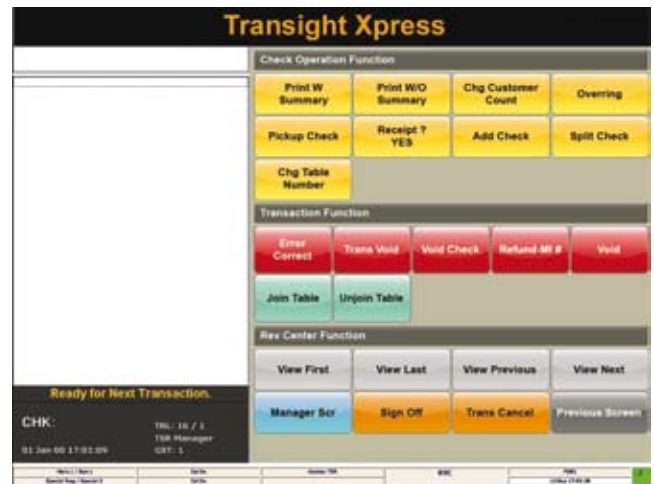

Designed to help you run a more efficient store from the start, Transight Xpress is equipped with intuitive, wizard-based installation and automatic installation for hardware devices. With excellent ongoing support options, you will have the assurance that you will get fast answers to questions and support that helps ensure your system runs smoothly.

### High scalability

Transight Xpress is customisable with the facility to programme up to 9,999,999 menu items to meet your specific needs. As your business grows and expands, Transight Xpress gives you the ability to upgrade to the enterprise version of Transight, while Unicode features support multiple languages that will cater to your future international expansion plans, providing you the flexibility to respond to changes in the marketplace and to adopt innovations quickly and securely.

### Low entry cost

Transight Xpress is designed to take advantage of Microsoft Data Engine, a royalty-free, re-distributable version of Microsoft SQL Server that is ideal for client applications that require an embedded database. It is also designed to run on Microsoft Windows Embedded Point-Of-Service Operating System, which is cheaper than the Standard Windows Operating System. By utilising cost effective technology, Transight Xpress helps you minimise your cost allowing you to fully maximise your resources to grow your business.
